services

PUBLIC TOILETS: CHALLENGES & SOLUTIONS BY HAPPEE SERVICES

A LIMITED BUDGET

Happee Services solutions are accessible to municipal budgets and can be rented or purchased depending on needs. They are **flexible, mobile, and require no construction work, no water connections, and no electricity, ensuring controlled costs.**

A FLEXIBLE INSTALLATION

Our sanitary facilities **can be deployed quickly and efficiently** in locations without existing sanitation infrastructure, for special events, or in tourist areas. The positioning of our equipment **is flexible depending on the needs of the urban space, as installation and removal do not require complex road infrastructure (VRD).**

ROBUST AND DESIGN-LED EQUIPMENT

The design of the range has been created to **ensure harmony between products and with the environment in which they are installed.** All units share the same finish: a high-resistance material, durable against weather conditions, UV exposure, and vandalism. They are also easy to clean in the event of graffiti. They are modern and design-led, with several colour options available on request. To avoid disturbing residents, we offer male and female urinals designed to preserve everyone's privacy.

A SUSTAINABLE AND INCLUSIVE APPROACH

Happee Services sanitary solutions address the **three pillars of CSR.** Our equipment is designed to improve **accessibility for people with reduced mobility and families with babies.**

To ensure inclusion of women and offer an alternative to male urinals, we provide a female urinal, created by a woman, for women. All our equipment is locally designed in France, and the materials come from a recycling supply chain. They require no water and no electricity, making them self-sufficient and environmentally friendly. We also offer a urine collection service, enabling its recovery for use in agriculture.

OUR SANITARY FACILITIES

for your urban spaces

More agile, eco-friendly and cost-efficient, our mobile toilets have been designed to integrate into the urban environment, taking into account the expectations of city residents and local authorities: accessibility, hygiene, privacy, safety, environmental responsibility, inclusion, and aesthetics.

As a reinforcement to an existing sanitation setup or to equip a site with high footfall, our mobile facilities are ideal to ensure sanitary access for all, on beaches and coastlines, at tourist sites, in parks and gardens, on quaysides, in streets, and in commercial areas.

WOMEN'S MADAMEPEE CITY URINAL

INCLUSIVE

PRIVATE

ECO-FRIENDLY

ECO-FRIENDLY

Waterless urinal with no water consumption.
No environmental impact during installation.
Durability: resistant to weather, graffiti, and UV exposure.
Bio-based materials, designed in Loire-Atlantique and assembled in Brittany.

HYBRID

This madamePee unit can be either self-contained (200L tank capacity) or connected to a network, depending on your needs.

HYGIENE

Swing doors for easy access, a bowl designed for a squatting position, and an anti-splash grid.

COMPACT

Minimal footprint. High user turnover capacity. Paper bin with external emptying access.
Ideal urinal for high-traffic areas: 45 seconds of use compared to 2 min 30 with a traditional toilet.

*Urine collection available for recovery into an agricultural bio-solution via our partner Toopi Organics.

MEN'S MISTERPEE CITY URINAL

ECO-FRIENDLY

Waterless urinal with no water consumption.
No environmental impact during installation.
Durability: resistant to weather, graffiti, and UV exposure.
Bio-based materials, designed in Loire-Atlantique and assembled in Brittany.

HYBRID

This misterPee unit can be either self-contained (200L tank capacity) or connected to a network, depending on your needs.

HYGIENE

Swing doors for easy access, and an ergonomic urinal.

COMPACT

Minimum footprint. High user turnover.
Ideal urinal for high-traffic environments:
45 seconds of use compared to 2 min 30 with a traditional toilet.

*Urine collection available for recovery into an agricultural bio-solution via our partner Toopi Organics.

CITYLOO PUBLIC DRY TOILET

INCLUSIVE

TECHNOLOGICAL

ECO-FRIENDLY

ECO-FRIENDLY

No soil disturbance, no earthworks.

Can be installed or relocated depending on the city's needs.

Fully self-sufficient, requiring no connections (water, electricity, or sewage).

Equipped with an accessible (PMR) toilet and 2 dry urinals, CITYLOO is designed for all users.

0% WATER CONSUMPTION

CITYLOO uses no water and has been designed to enable waste recovery and soil preservation.

ROBUSTNESS

Tubular aluminium structure: resistant to urban exposure and intensive public use. Facade cladding made of recycled laminated panels, with a lifespan of up to 50 years against weather conditions. It integrates perfectly into urban areas and parks.

These toilets are equipped with a conveyor system that separates and removes solid and liquid waste. As a result, urine can be converted into fertiliser, while solid waste is recovered and valorised.

*Urine collection available for recovery into an agricultural bio-solution via our partner Toopi Organics.

KAZUBA CITY ACCESSIBLE DRY TOILET

INCLUSIVE

TECHNOLOGICAL

ECO-FRIENDLY

ECO-FRIENDLY

Fully self-sufficient, it is equipped with solar panels and requires no connections (water, electricity, lighting, or sewage).

It includes an accessible (PMR) toilet, and a ramp can be provided if earthworks are not possible. Product manufactured in France.

TECHNOLOGIE

Ces toilettes sont équipées d'un boîtier électronique assurant leur bon fonctionnement et le contrôle des différents dispositifs techniques. Un tapisroulant permet d'évacuer les selles et l'urine en les séparant. Une cheminée de ventilation offre une circulation de l'air en continu, garantissant une utilisation sans odeur et optimisant la décomposition des matières..

SIMPLE AND EFFICIENT

High capacity allowing up to 2,500 uses before emptying.

Wood structure with stainless steel reinforcement, designed to withstand time and intensive public use.

ÉCOLOGICAL

The BUMPER consumes only 0.5L of water per day for proper operation. It is designed to enable waste recovery and valorisation.

CITY FAMILY & PRM WC CABIN

INCLUSIVE

FAMILY-FRIENDLY

ECO-FRIENDLY

ACCESSIBLE TO PEOPLE WITH REDUCED MOBILITY

Spacious Type C cabin, suitable for wheelchair users. It provides a 1.50m turning space for wheelchairs. The seat height is 51 cm.

EASY ACCESS

Door width adapted for wheelchair access. Door locking system when open for added safety. Ground-level cabin requiring no access ramp.

FAMILY-FRIENDLY

Spacious cabin suitable for families, equipped with a baby changing table.

Pee for the many !

Beyond our expertise in the rental of sanitary equipment and related services, we are building an economy based on the values of sharing, responsibility, and sustainability.

Our CSR policy relies on active and structured listening to both our clients and employees, in order to align their expectations with our activities.

CIRCULAR ECONOMY

In order to contribute to the preservation of ecosystems, we have implemented a process within our company focused on the transformation and recovery of our waste. This circular approach applies both to our equipment and to the effluents we collect.

SOCIAL INNOVATION

Happee Services is committed to respecting freedom of association and the right to collective bargaining, contributing to the elimination of all forms of employment discrimination, and providing a safe, positive and supportive working environment with fair and pleasant working conditions.

INCLUSIVE SOLUTIONS

We are committed to designing hygiene solutions that are accessible to everyone, everywhere. In line with this approach, we offer adapted versions of each of our units for people with disabilities. We also develop innovations for women, aiming to ensure equal waiting times compared to men.

TOWARDS NEUTRALITY CARBON

Happee Services is actively committed to reducing its CO₂ emissions on a daily basis. This includes the use of low-carbon vehicles (gas-powered and hybrid), strict maintenance processes, route optimisation tools, and tree-planting initiatives. We implement every possible measure to minimise our carbon footprint.

CREATING VALUE WITHIN LOCAL TERRITORIES

While Happee Services operates two agencies in the Paris region and one in the South of France, our Enygea Group currently brings together around fifty agencies and depots across France (WC Loc, Waterlab, Bases Clean, Moov&Cook and Swittec), employing 700 people. Each agency is committed to contributing to the development of the local economy within its territory.

Our employment policy is dynamic, and we prioritise recruitment as close as possible to our agencies, notably by leveraging local recruitment channels.

HUMANITARIAN COMMITMENT

By becoming a partner of the humanitarian race Urgent Run Paris, Happee Services strengthens its commitment to a cause that is close to its heart: toilets everywhere, for everyone. Urgent Run Paris is a sporting and solidarity-based event held every year in several cities around the world. Participation fees are donated to associations supporting projects to build sanitation facilities.

Happee Services is part of the **enygea** Group, which supports you throughout France and internationally.
